	Census	Estimate				Preliminary	Projection
	1999	2006	2007	2008	2009	2010*	2011**
Grays Harbor	\$ 36,410	\$ 42,029	\$ 43,126	\$ 42,646	\$ 39,927	\$ 39,452	\$ 39,836
Washington	\$ 45,776	\$ 53,522	\$ 56,141	\$ 57,858	\$ 55,458	\$ 54,888	\$ 55,500

Notes:

- In 2011 dollars
- 1989 and 1999 median income values are derived from the 1990 and 2000 U.S. Census of Population and Housing, respectively. Estimates of median household money income for the inter- and post-Census years are based on the Bureau of Economic Analysis (BEA) personal income data and the estimates of household characteristics, at the county level. For 2006-2010: The median household income estimates are anchored upon ACS estimates wherever available.
- *In addition to the state personal income data published by BEA, the payroll data compiled by the state Employment Security Department are used in the Preliminary estimates of 2010 median household income.
- **The Revenue Forecast Council's September 2011 forecast of the state personal income is used in the projection of 2011 median household income.
- Money income, as defined by the Bureau of the Census, includes wage or salary income, self-employment income, interest, dividend, rental income, social security or other public assistance income, retirement, and disability income; etc. It excludes some components of personal income defined by the BEA. For example, employer-paid pension and medical benefits are included in personal income but not in money income. The median measures the point at which half of all households have more income and half have less.
